

## CAS - Chalk Talk

The Middle School is off and running. Last week, students began their Friday special schedules including morning reading, math, and Mr. Oh!'s "What's Science Ever Done For Us?" enhancement courses. In the afternoons, students participate in the classes they get to choose. The electives include: American Sign Language, LO games, and guitar with Mr. Mederios; film/character studies and Habits For Effective Teens with Mrs. Garza; Mrs. Kelsey is teaching yearbook, board games strategies and crime scene investigation. Mrs. Tomlinson is taking her students on a whirlwind tour of mythology in her Dragonology class, as well as offering kite building, rocketry and Chess Tournament. Students can continue to explore their scientific and creative sides with Mr. Oh!'s Jason Project in the computer lab, creative writing, and yoga classes.
